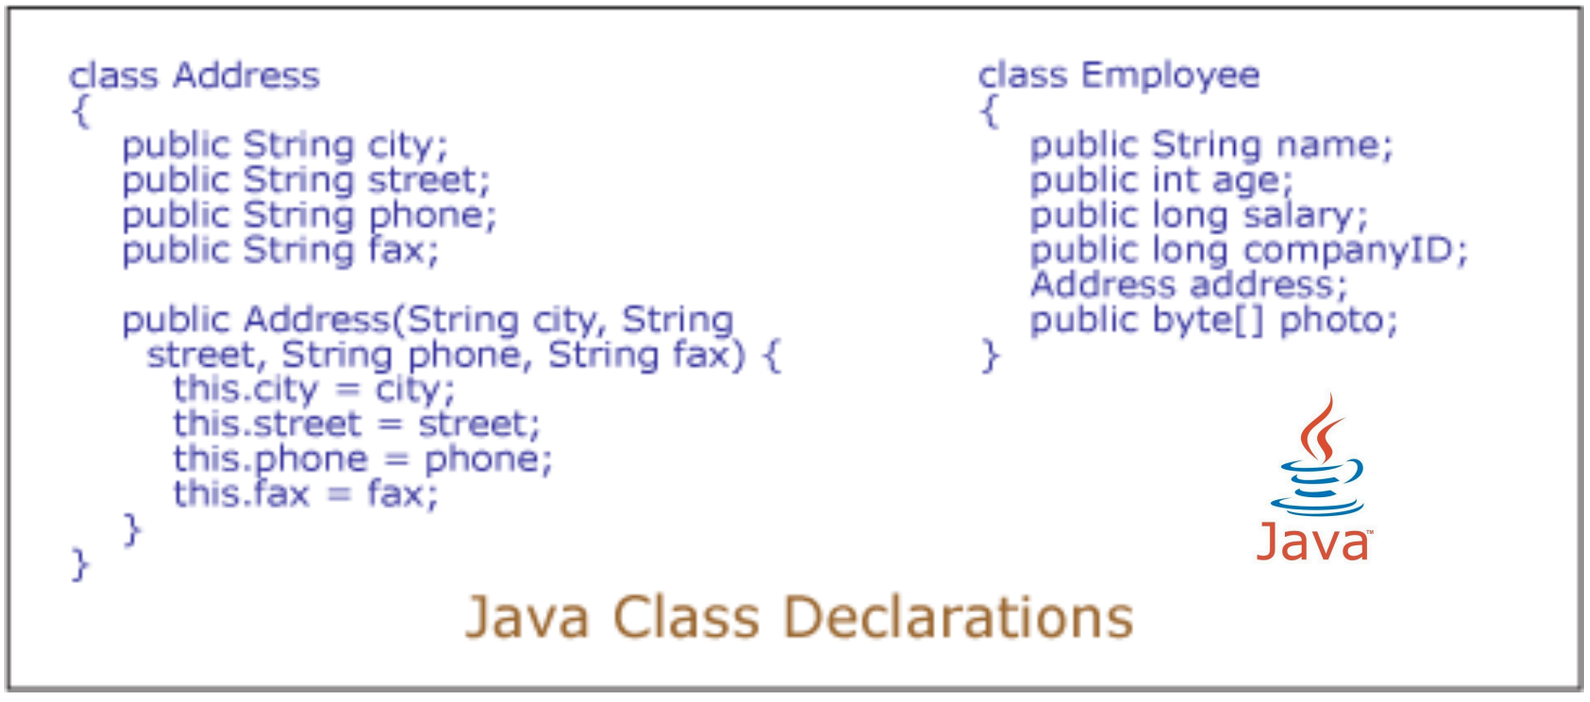
Programmieren I

Praktikum-1:
“Klassendefinitionen I”

Dr. **Sebastiano Panichella**

20.09.2018



About me

Sebastiano Panichella

Senior Research Associate Zürcher Hochschule für Angewandte Wissenschaften

Zurich University of Applied Science

School of Engineering

https://www.zhaw.ch/de/ueber-uns/person/panc/

or

https://spanichella.github.io/

About me

Sebastiano Panichella

Senior Research Associate Zürcher Hochschule für Angewandte Wissenschaften

Zurich University of Applied Science

School of Engineering

https://www.zhaw.ch/de/ueber-uns/person/panc/

or

https://spanichella.github.io/

Research Interests:

Software Engineering (SE) and cloud computing (CC): Continuous Delivery, Continuous integration, Software maintenance and evolution (with particular focus on Cloud Applications), Code Review, Mobile Computing, Summarization Techniques for Code, Changes and Testing.

Programmieren I

Praktikum-1:
“Klassendefinitionen I”

OLAT: Unterslagen
-> Praktikum
-> 02_Klassendefinitionen_Praktikum-1.pdf

Praktikum

Praktikum

Ordinary Praktikum

<u>Fast Track</u>

Praktikum

Ordinary Praktikum

Fast Track

GROUPS:
The students form teams of two people and communicate under which username (ZHAW abbreviation) the teams are formed to the lecturer.

TASKS:
- INDIVIDUAL TASK: Every member of the team perform each task individually (in the individual "**fork**"). This means that the students need to share the individual solutions done in their **GIT repositories** to the lecturer.

- MERGE: Then, in a collaborative manner the students merge their solutions proposing one final (improved) solution (e.g., in a folder called "**merged-praktikum-1**").

- SHARING THE FINAL SOLUTION: The final solution of the exercise (i.e., "merged-praktikum-1") should be shared to the lecturer **"always" in the same repository** (i.e., one of the student Git repository)

DELIVERY:
If not otherwise communicated, at least
24 hours BEFORE the next lab session.

EVALUATION:
For each team of two, 2 "Praktika" will be assessed (1 in the first 4 weeks and 1 afterwards). ***Score ranges 0 - 5 (bad 0, ok 3, good 5)***
The selection is random and will not be communicated in advance.

Praktikum

Ordinary Praktikum

<u>GROUPS</u>:
The students form teams of two people and communicate under which username (ZHAW abbreviation) the teams are formed to the lecturer.

<u>TASKS</u>:
- INDIVIDUAL TASK: Every member of the team perform each task individually (in the individual "**<u>fork</u>**"). This means that the students <u>need to share</u> the individual solutions done in their GIT **repositories** to the lecturer.

- MERGE: Then, in a collaborative manner the students merge their solutions proposing one final (improved) solution (e.g., in a folder called "**merged-praktikum-1**")

- SHARING THE FINAL SOLUTION: The final solution of the exercise (i.e., "merged-praktikum-1") should be shared to the lecturer **<u>"always" in the same repository</u>** (i.e., one of the student Git repository)

<u>DELIVERY</u>:
If not otherwise communicated, at least
24 hours BEFORE the next lab session.

<u>EVALUATION:</u>
For each team of two, 2 "Praktika" will be assessed (1 in the first 4 weeks and 1 afterwards). ***<u>Score ranges 0 - 5 (bad 0, ok 3, good 5)</u>***
The selection is random and will not be communicated in advance.

<u>Fast Track</u>

Level Test:
They make the placement test on their own and check your solution by using the "Solution".

Selbstkontrolle: Selbstkontrolle by reading and answering the questions (online).

Classes: Lessons can be selectively visited (Self-control).

Simple individual project:

- Extension of the text-based adventure **game** "<u>Zuul</u>" from the textbook (described in Chapter 6 and 9).

- Alternatively, implement simplified text-based version of games like "Snake, Pac-man, Naval Battle, Laser Reflection Game, Bubble Spinner, Asteroids Game" or ***<u>Propose a project.</u>***

Meeting with the lecturer:
Check and feedback of your work in a total of **<u>3 meetings</u>** with the lecturer:
1) the student has ***<u>2 (max 3) weeks to select and describe the project</u>*** (which feature will be implemented of the game, etc.)
2) Middle of the course (check of the ongoing project)
3) ***<u>A final meeting</u>*** close to the end.
